RESEARCH INTERESTS

Experimental design, statistical computing, neuroimaging, genomics, longitudinal studies

EDUCATION

University of Wisconsin-Madison

August 2016 - Present

PhD, Statistics

Louisiana State University Health Sciences Center

May 2016

MS, Biostatistics

Thesis: “Optimal Designs for Wavelet Regression Models”

Advisor: Zhide Fang

University of Wisconsin-Milwaukee

May 2014

BS, Physics

PROFESSIONAL EXPERIENCE

University of Wisconsin-Madison

September 2017 - Present

Research Assistant, Advisor: Paul J. Rathouz

Madison, WI

- Studying outcome-dependent sampling in longitudinal studies with complicated structures.

University of Wisconsin-Madison

August 2016 - August 2017

NIH Predoctoral Trainee in Biostatistics, Program Director: Paul J. Rathouz

Madison, WI

- Grant number: T32HL083806-10
- Performed semester-long rotations:
 - Summer 2017:** Worked with Paul J. Rathouz and Katie Hustad on a longitudinal study focusing on expressive language development of children diagnosed with Cerebral Palsy.
 - Spring 2017:** Worked with Michael Newton on an Empirical Bayes Method to compare covariance matrices across multiple conditions.
 - Fall 2016:** Worked with Christina Kendzierski on analysis of single cell mRNA sequencing experiments.

Johns Hopkins University, Bloomberg School of Public Health

Summer 2016

Summer Intern, Advisor: Ciprian M. Crainiceanu

Baltimore, MD

- Worked with the Statistical Methods and Applications for Research in Technology (SMART) Research Group.
- Addressed issues in segmentation of stroke ischemia patients by implementing a localized neighborhood principal components analysis approach.
- Participated in the France Life Imaging-Information Analysis and Management (FLI-IAM) Multiple Sclerosis Lesion Segmentation Challenge with John Muschelli, Elizabeth Sweeney, and Russell Shinohara. We implemented a random forest technique in the challenge.

PUBLICATIONS

Peer-Reviewed:

Maronge JM, Zhai Y, Weins DP, Fang Z. *Optimal designs for wavelet regression models*. The Journal of Statistical Planning and Inference. 184, 2017.

Tudorascu D, Karim H, **Maronge JM**, Alhilali L, Muschelli J, Crainiceanu C. *Reproducibility and Bias in Healthy Brain Segmentation: Comparison of Two Popular Neuroimaging Platforms*. Frontiers of Neuroscience. 10, 2016.

Manuscripts in progress:

Maronge JM, Muschelli J, Crainiceanu C. *Global PCA decomposition of local neighborhood moments with applications to MRI*. In progress.

PRESENTATIONS

Talks:

Maronge JM. *Empirical Bayes Analysis of Covariance* University of Wisconsin Department of Biostatistics and Medical Informatics Student Seminar, Madison, WI, May 5, 2017.

Maronge JM. *Single Cell RNA Sequencing: Analysis and Applications* University of Wisconsin Department of Biostatistics and Medical Informatics Student Seminar, Madison, WI, December 16, 2016.

Posters:

Maronge JM, Fang Z. *Optimal Designs for Wavelet Regression Models*. Louisiana State University Health Sciences Center School of Public Health Delta Omega Research Day, New Orleans, LA, April 20, 2016.

Maronge JM, Fang Z. *Optimal Designs for Wavelet Regression Models*. Louisiana State University Health Sciences Center School of Graduate Studies Research Day, New Orleans, LA, November 6, 2015.

PROFESSIONAL MEMBERSHIPS

American Statistical Association	April 2015 - Present
Delta Omega Honorary Society for Public Health	May 2016 - Present

COMPUTING SKILLS

Languages:	R, SAS, MATLAB, Virtual Basic, Mathematica
Markup:	L ^A T _E X, Rmarkdown, Microsoft Office

SOFTWARE

medals: R package to implement Memory Efficient Decomposition for Analysis of Local neighborhood moments for Segmentation (MEDALS). Available on GitHub.
